	Chorian Amilion Amisio	Placeata Repro	Chapter 18 duction
- 6	KUPA	MRGOLLES	
ANN	TXIV	Reproduction is very important to the sur	rvival of:
UU	0	(a) Species	(b) Individual
-		(c) Population	(d) Both a and b
	PAST	PAPER MCQs	
	(2)	Reproduction is necessary for the surviva	d of: (GRW 2021, RWP 2021)
		(a) Individual	(b) Species
		(c) Community	(d) Biome
		REPRODUCTION	N IN PLANTS
	KIPS	MCQs	
	(3)	Meiosis occurs in plants at the time of:	
		(a) Gametogenesis	(b) Sporogenesis
		(c) Both of these	(d) None of these
	(4)	Seed plants with archegonia are:	
		(a) Ferns	(b) Angiosperms
		(c) Gymnosperms	(d) Both b and c
	(5)	In which of the following there is vestigia	A
		(a) Angiosperms	(b) Gymnosperms
		(c) Ferns	(d) Bryophytes
	(6)	Hormone inducing parthenocarpy is/are:	
		(a) Auxins	(b) Gibberellins
		(c) Cytokinins	(d) All of the above
	(7)	Dormancy is favourable if:	~ran
		(a) Conditions are favourable	(b) Low temp and harsh winter
		(c) Germination has started	(d) All of the above
	(8)	Auxins, gibberellins and cytokinins in de	
		(a) Development of embry	(b) Accumulation of food reserves
	$\langle 0 \rangle$	(c) Some times accumulation in the perica T	
	(9)	Which of the following is not controlled a	
		(a) Leaf ful	(b) Fruit and seed production
	(10) -	(c) Chlorophyll synthesis Development of scealess fruit without fer	(d) Seed dormancy
-	(10)		
ANN	NV4L	(a) Climacteric (c) Parthenocarpy	(b) Apomixis(d) Seed dormancy
11/1	(11)	Fruit ripening is often accompanied by a	•
~		(a) Climacteric	(b) Apomixis
		(c) Parthenocarpy	(d) Dormancy
		(c) rathenocarpy	(a) Domancy

	(12)	Climacteric activity is associated with rele	ease of:	~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~
		(a) Auxin	(b) Cytokinin	
		(c) Ethene	(d) ABA	
	(13)	Diplohaplontic life cycle is found in:	$1 - \pi r_{0} $	2.1000
		(a) All plants	(b) Lower plants only	
		(c) All vascular plants	(d) All seed plants	
	PAST	PAPER-MCQs		
	(14)	Evolution of pollon tube is parallel to the	evolutin of:	(RWP 2017)
		(a) Stem	(b) Leaves	
	- 00	(c) Fower	(d) Seed	
R		The pectal condition of rest, which enables	s an embryo to survive the long	periods is:
	UU			(MTN 2017)
)		(a) Root Dormancy	(b) Shoot Dormancy	
		(c) Seed Dormancy	(d) Plant Dormancy	
	(16)	Fruit ripening is often accompanies by a	burst of respiratory activity ca	alled the:
		(DGK 2017, SWL 2017, RWP 2017, M		
		(a) Dimetric	(b) Climax	, , ,
		(c) Climacteric	(d) Trimetric	
	(17)	Which one is Parthenocarpic Fruit:		(SWL 2018)
		(a) Apple	(b) Pineapple	
		(c) Peach	(d) Mango	
	(18)	Developing seeds are a rich source of:		(SWL 2019)
		(a) Auxins	(b) Gibberellins	
		(c) Cytokinins	(d) All of above	
	(19)	Parthenocrapy is sometimes artificially in	duced in tomato, peppers etc.	by adding:
			(MTN 202	21, FSD 2021)
		(a) Absisic acid	(b) Cytokinins	
		(c) Auxins	(d) Gibberellins

MAN MANALOUM 2. COM

TOPIC WISE SHORT QUESTIONS INTRODUCTION

KIPS SHORT QUESTIONS

- Q: 1 What is reproduction? What is its importance?
- Ans. Reproduction:

Ans

It is the mechanism that produces new generations and maintains a species.

Importance:

It is very important to the survival of a species or a population.

REPRODUCTION IN PLANTS

KIPS SHORT QUESTIONS

Differentiate between isomorphic & heteromorphic alternation of generations.

Isomorphic	Heteromorphic
Diploid sporophyte and haploid gametophyte generations are vegetatively similar .	Diploid sporophyte and haploid gametophyte generations are vegetatively dissimilar .
Mostly occurs in green algae.	This occurs in all plants.

- Q: 3 What is importance of evolution of pollen tube?
- **Ans.** Pollen tube is a tool of success for seed plants. In spermatophytes it acts as vehicle for male gametes for their safe transport to female gamete in ovule in hostile land environment.

Q: 4 What is seed dormancy? What is its importance?

Ans. It is special condition of rest in which embryo ceases or limits its growth in seed. It enables an embryo to survive long periods of unfavourable environmental conditions such as water scarcity or low temperature.

Q: 5 Define parthenocarpy. How it can be induced?

Ans. Parthenocarpy:

Development of fruit without fertilization and without seed formation is called parthenocarpy. **Induction:**

It is artificially induced by application of auxins.

Q: 6 What are spermatophytes?

Ans. The seed producing plants are known as spermatophytes. For example, gymnosperms and angiosperms.

PAST PAPER SHORT QUESTIONS

- Q: 7
 Define parthenocarpy with examples. (GRW 2018, LHR 2017, GRW 2018, SWL 2018)

 Q: 8
 What is seed dormancy? (DGK 2017, FSD 2018, FSD 2019, LHR 2021, SWL 2022)

 Q: 9
 Define Fruit set. (DCK 2017, RWF 2017)

 Q: 10
 Define climacteric. (SGD 2019, MTN 2021, FSD 20321)

 Q: 11
 What is diplohaplontic life cycle? Give its types. (CKW 2018, GRW 2018, 2019)
- Q: 12 What is the advantage of evolution of pollon tube? (DGK 2018)
 - Q: 13 Write down the mechanism of pollen tube evolution in spermatophytes.

Q: 14 What is "Truit set" in plants? Discuss the role of pollen grain in it. (MTN 2019)

- **O: 15** How a Seed is forme 1?
- Q: 1 Defire haploid Parthenocarpy with an example.
- Q: 17 Define parthenocarpy and seed dormancy.

PHOTOPERIODISM, VERNALISATION

KIPS SHORT QUESTIONS

Q: 18 Write name of two LDPs & two SDPs.

- Ans. LDPs: Henbane, cabbage.
 - **SDPs:** Cocklebur, soyabean.

(SWL 2019)

(DGK 2019)

(FSD 2021)

(**BWP 2018**)

(SGD 2017)

(MTN 2018)

(RWP 2018)

Q: 19 What is phytochrome? What are its types?

Ans. Phytochromes:

These are blue light sensitive protein pigments involved in flowering. Types:

Phytochromes exist in two forms i.e. P660 and P730 P550 a quescent form absorbs red light and is converted to active P750, P730 absorbs for red light and is converted in P660.

Q: 20 What is Vernalisation:

Ans. The low competative treatment of plants for stimulating flowering in them is called vernalisation. The low competature stimulus is received by the shoot apex of a mature storn or employe of the seed.

PASINI APERSHORT QUESTIONS

- **C: 21** Define Photoperiodism.
- **Q: 22** Define phytochromes. Give their types.
- **Q: 23** How do photoperiodism and vernalisation resemble with each other?
- **Q: 24** Give two examples of short day plant.
- Q: 25 Define vernalisation. Give its one importance.

(GRW 2018, BWP 2017, MTN 2017, 2018, LHR 2018, 2019)

REPRODUCTION IN ANIMALS, ASEXUAL REPRODUCTION TISSUE CULTURING & CLONING, IDENTICAL TWINS

KIPS SHORT QUESTIONS

Q: 26 Differentiate between identical twins & fraternal twins.

Ans.

Identical Twins	Fraternal Twins
Identical twins are produced by separation	Fraternal twins are formed by fertilization of
and development of two blastomeres of the	two eggs separately by two sperms.
same embryo at two celled stage.	
These are the product of asexual	These are the product of sexual reproduction.
reproduction.	
They are called monozygotic as both develop	They are called dizygotic as each develop from
from single zygote.	separate zygote.

Q: 27 What is apomixis?

Ans. It is one of the form of parthenogenesis in flowering plants. In this a diploid cell of the ovule, either from the nucellus or megaspore, develops into a functional embryo in the absence of a male gamete.

Q: 28 What is tissue culturing?

- **Ans.** The culturing of tissues for reproducing new identical varieties of plants is called lissue culturing. In tissue culture technique, carabiant tissue excised from plants can be stimulated by the addition of nurrition, cytoking, and IA(2)
- Q: 29 Define cloning.
- **Ans.** The type of asexual reproduction in which genetically identical copies of organism is produced by genetic engineering is known as cloning.

PAST FATER SHORT-QUESTIONS

<u>\Q:\</u> BD\	What are traternal twins?	(MTN 2017)
0:31	What are traternal twins? How identical twins and fraternal twins are produced?	(RWP 2017)
Q: 32	Define apomixes.	
	(RWP 17, LHR 2018, GRW 2018, DGK 2019, FSD 2018, 2019, SGD 2019	, MTN 2021)

- Q: 33 How identical twins are produced?
- **Q: 34** Define Diploid parthenogenesis with example.

(SGD 2018)

(LHR 2019)

Q: 35 Give some advantages and disadvantages of cloning. (LHR 2017, GRW 2017) Q: 36 Differentiate haploid parthenogenesis and diploid parthenogenesis. (FSD 2317, MTN 2021) (FSD 2007, SGD 2017) **Q: 37** Briefly explain identical twins. Q: 38 Define asexual and sexual reproduction. (DGK 2019) SEXU REPRODUCTION KIPS SHORT OUTSTIONS Q: 39 Differentiate between oviparous and viviparous animals. Ans. Wiparous Viviparous In these animals external development In these animal internal developments takes place. They lay shelled eggs. This takes place. The development of embryo shell protects the developing embryo from is completed inside the female body. The harsh terrestrial conditions. Such animals female gives birth to young one. Such animals are called viviparous. are called oviparous. Examples: **Examples:** Reptiles and birds Mammals PAST PAPER SHORT QUESTIONS Q: 40 Enlist methods of asexual reproduction. (SWL 2017) Q: 41 How external fertilization differs from internal fertilization? (LHR 2018) Q: 42 What are viviparous? Give an example. (DGK 2019) Q: 43 Differentiate between oviparous and viviparous. (MTN 2017, SWL 2018, LHR 2019, GRW 2019, LHR 2021, GRW 2021) REPRODUCTION IN MAN MALE REPRODUCTIVE SYSTEM KIPS SHORT QUESTIONS Q: 44 Enlist different components of male reproductive system. Different components of male reproductive system are. Ans. Copulatory organ a. b. Testis Ducts c. Glands d. PAST PAPER SHORT QUESTIONS (BWP 2017) Q: 45 Give the functions of sertoli cells. Q: 46 Describe Spermatogenesis-the formation of sperms in human males. O(MTN 2919) **Q: 47** Give the route of sperms from test is to Outside in man. (BWP 2021) Q: 48 Write the functions of Sertoli cells and interstitial cells. (LHR 2021) FEMALE REPRODUCTIVE'S KIPS SHORT QUESTIONS Q: 49 What is placenta? In placental marmais placenta is a tissue that develops between uterus of mother and Ans letus for exchange of materials between mother and fetus. What is ovulation? In humans where fertilization occurs? 0.50 **Ovulation:** Ans. The release of ovum from the follicles is called ovulation. **Fertilization in Human:**

Chapter-18	Reproduction	
PAST PAPER SHORT QUESTIONS		
Q: 51 Define placenta. Give its function.	(GRW <u>2</u> 917)	
FEMALE RE		
KIPS SHORT QUESTIONS		
Q: 52 What is oestrous cycle?	\mathcal{Q}	
Ans. It is a reproductive cycle found	in all fomale mammals except human beings. In this	
	repares the iterus for conception partly and follicle	
	e meets a physical stimulus of mating for ovulation.	
Q: 53 Define Menopause.		
female stops to produce ova.

Q: 62 Differentiate between menstrual an		
BIRTH, TE	EST TUBES BABIES	
KIPS SHORT QUESTIONS		
Q: 63 What is lactation? Which hormo	ones stimulate it?	
Secretion or formation of milk from mammary glands is called as lactation. Prolactin		
	placental lactogen from placenta stimulate it.	
	Name the maternal hormones involved in triggering of birth.	
1 1		
oxytocin triggers the birth.		
Q: 65 What is after birth?	What is after birth? Within 10-45 minutes after birth, the uterus contracts, separates and expels the placenta	
birth.	that passes out through vagina. This is called as after	
Q: 66 What is a test tube baby?		
•	hat was fertilized outlide the body (in vice) and then	
	ber is called as test tube baby Placenta establishes and	
	e in the body of mother leading to normal birth.	
O: 67 Name fetal hormones involved in		

- Q: 67 Name fetal hormones involved in triggering of birth.
- Ans. The ACTH released from letal pituitary stimulates the fetal adrenal gland to release corta osteroids, which cross-placental barrier and enter the maternal blood circulation causing a decrease in progesterone production. The reduction of progesterone level stimulates the pituitary gland to produce oxytocin hormones. This induces labor pain.

AST PAPER SHORT QUESTIONS

Q: 68 Write a note on test tube babies.

(LHR 2017, LHR 2017, GRW 2019, RWP 2019, SGD 2021) Q: 69 Differentiate between lactation and gestation. (DGK 2018)

(RWP 2021, FSD 2021)

- **Q: 70** Define gestation period and after birth.
- **Q: 71** Name the hormones secreted by placenta.
- Q: 72 What is after birth?
- Q: 73 Write down the function of ACTH released from fetal pituitary
- Q: 74 How process of child birth is initiated in human?
- Q: 75 What are the functions of placenta during programcy
- Q: 76 Give the mechanism of myitro fe tilization.

SEXUALLY TRANSMITTED DISEASES

KIPS SHORT QUESTIONS

O: 77 Why in every STD eyes of neonate are affected? Ans. If women suffering from STD's birth canal is inf

Ir women suffering from STD's birth canal is infected and it is possible for neonate to become infected. The eyes of new born become infected when it passes through this infected birth canal.

Q: 78 What are STDs. Write Names?

Ans. Sexually transmitted disease (ST(d) is a term used to describe different infections that are transmitted through exchange of semen, blood, and other body fluids; or by direct contact with the affected body areas of people. Sexually transmitted diseases are also called venereal diseases. **Examples:** are Gonorrhea, Syphilis, Genital herpes and AIDS etc.

Q: 79 Explain one bacterial & one viral ST(d)

Ans. Syphilis:

Is caused by a bacterium spirochaete *Treponema pallidum*. It damages the reproductive organs, eyes, bone joints, central nervous system, heart and skin. Source of dissemination is sexual contact.

Genital Herpes:

It is caused by herpes simplex type 2 virus. It is most frequently transmitted by sexual contact causing infection of the genitalia. It produces genital soreness and ulcers in the infected areas.

Q: 80 What is AIDS?

Ans. AIDS or Acquired Immunodeficiency Syndrome is caused by HIV. It is characterized by weakened immune system and may lead to fatal infections by other pathogens. It is one of the sexually transmitted diseases.

Q: 81 Explain the disease gonorrhoea.

Ans. It is caused by a gram-positive bacteria *Neisseria gonorrhoeae*. It mainly affects the mucous membrane of urinogenital tract. New born infants may acquire serious even infections if they pass through the infected birth canal It is highly contagious series disease. It is transferred through sexual contacts.

PAST PAPER SHORT QUESTIONS

- Q: 82 Describe four sexually transmitted clises ses.
- Q: 83 What is the cause and effect of syphilis?
- Q: 84 Give the names of any two sexually transmitted diseases.
- Q: 85 What is gonorihea and who caused it?
 - : 5. Write do vr lew words on genital Herpes.
 - 7 Uescribe gonorrhea.

(GRW 2017) (SWL 2017, RWP 2018) eases. (DGK 2018) (DGK 2018) (MTN 2019, DGK 2019, MTN 2021) (SWL 2019, GRW 2021)
