READING COMPREHENSION

Direction: Please read the passage below and answer the questions on the basis of what is stated or implied.

Passage:

The Nile is the largest river of the world. Although it farms many falls and cataracts, it is navigable for quite a long distance. Floods in the Nile are caused by heavy summer rains in Ethiopia. The water overflows the banks and spreads over a large area. When it recedes, it leaves behind a thick layer of mud which makes the land rich and fertile.
